-
- ❖ **Tennis Grand Slam Draw** ; This project was intended to schedule matches between players based on ranking (or) rating of each player. So using probability distribution and Math random function it has to be proved that the Player 8 has less than 9% chance to win against the Player 1
 - ❖ **Heads you win** ; This project was intended to get the score based on tosses conducted by computer & player. The tosses carried out was in the interval of 1 second and total of 4 rounds. Each round has 10 tosses. The output, who leads by how many heads was being consoled out after every round.
-
